Welcome to your organized life with Tap Forms.

Life takes us many places, and it's hard to stay organized. A powerful and easy-to-use organizational app, Tap Forms is designed to meet your unique needs at work, home, or on the go. Neatly organize anything you can imagine with this digital filing cabinet for your life.

Who is Tap Forms for?

Tap Forms was designed for anyone who wants to organize their personal life, and for businesses who want to organize their business.

There's really no limit to what Tap Forms can help you organize. Here are just ways Tap Forms is being used:

- Managing finances
- Recipe listings
- To-do lists
- Inventory management
- Movie and book libraries
- Wine collections
- Vehicle maintenance
- Patient information
- Order management
- Customer relationship management (CRM)
- Legal case research
- Real estate listings
- Club memberships
- Genealogy research
- Client billing

Everything from your valued business contacts to your favorite recipes can be organized in a completely customizable and easy-to-find way. With Tap Forms, managing life's scattered details is now easier than ever before.

Key Tap Forms Features

- **Capture Your Way:** Snap a picture, type or scribble some text, record an audio note, scan a barcode — there are 23 different types of information that can be captured with Tap Forms
- **Organize Your Way:** Create and design custom forms exactly how you want to for optimal organization. Get started with one of our ready-to-go templates, or easily make a custom one from scratch with our integrated design tools.
- **Import, Export, Share:** It's easy to import your data from existing files, so getting started is a breeze. Import your data from text, CSV, Bento and more. One-tap exporting allows you to share with Mac, Windows, and Linux users.
- **Safe and Secure:** Tap Forms' security settings let you optionally require a password or a Touch ID scan (iOS), and even auto-lock when idle for a custom period of time. Using AES encryption, you can rest easy knowing your data is safe and secure.

- **Sync support:** with support for sync over the cloud or to nearby devices via your own local network connection, you can keep all your Tap Forms data on your iPhone and iPad in sync with your Mac. When you're at the store and can't remember which spices you need for your famous guacamole, just look it up on your iPhone using Tap Forms for iOS!
- **Saved Search Rules:** Create any number of filters that help you find and sort through thousands of pieces of information as quickly as you can tap a button. It's your data just the way you want it, exactly when you want it, in an instant.

New in Tap Forms 5

- **Multiple database document support:** Tap Forms now stores each database in a separate document. Each document is self-contained, including the database, photos, and file attachments. Database documents can easily be shared and synced with others. On the Mac version you can also have multiple database documents opened at the same time.
- **Sync with the cloud or without the cloud:** Tap Forms now syncs with IBM Cloudant to give you near instant syncing between all your devices near or far. Alternatively, you can sync directly to nearby devices using your own local network connection.

- **Sync password:** A password can (and should) be used for syncing between your devices with the new Nearby Sync feature. The password is a per-document based password so you can have different passwords for syncing different documents. This ensures that only you are able to sync your own documents on your own local network.
- **World Map view (Mac only):** The new World Map view enables you to see all your locations plotted on a world map. Each point on the map represents a location associated with the records in your form. You can even filter your records by area, view a standard map view, a satellite map view, or a hybrid map view. Double-clicking on a record will instantly take you to the location on the map represented by that record. And clicking on a pin on the map will instantly display the full record details for that location. Along with the advanced search feature, you can also reduce the number of points displayed on the map based on whatever search criteria you've specified.
- **Month Calendar view (Mac only):** The new Month Calendar view makes it easy to see how your records are organized by date for the displayed month. You can easily see your records grouped into each day, switch from month to month and filter your records by day or by multiple days. Along with the advanced search feature, you can also filter the records displayed on the calendar by whatever criteria you'd like.
- **Photo Grid view:** The new Photo Grid view lets you see all your records represented by one of your Photo fields. This is

really great for finding your records visually. For example, a movie library can display all your records as a grid of movie posters, or your real estate listing could display all the photos of the properties you are currently managing. The photos can also be grouped into different sections using any of your fields as a grouping criteria. For example, all your real estate properties could be grouped into different areas of the city. You can also adjust the size of the photos in the grid view.

- **Easily send database documents to other devices nearby:** No intermediate cloud service needed. It's like AirDrop for databases. Just pick a database, click the send button and choose another device that currently has Tap Forms running and send away. Moments later that database document will appear on your other device, ready to be used and synced.
- **Encrypt your database and your photos, file attachments, drawings, and audio recordings:** Now you can encrypt not only the data within your database, but also your photos, file attachments, drawings, and audio recordings. Tap Forms uses AES-256 encryption to keep your data away from anyone who doesn't have the key. This makes Tap Forms even more secure than ever.
- **Signature field type (capture & display on iOS, display only on Mac):** The new Signature field type was designed specifically to make it super easy to capture and display signatures on your iOS devices. And with sync enabled between your devices, the Mac version will display the

signature on your record moments after you've captured the signature on your iOS device.

- **Search enhancements:** Now you can search for records that match Any or All of the search rules specified. You can also search for records with dates that occur on or before today or on or after today. Great for keeping up with things to do.
- **Required fields (Mac):** You can now specify that certain fields within your form are required. Tap Forms will highlight which fields are required and will warn you if you attempt to save your record without filling in all required fields.
- **Pick List enhancements:** Pick Lists can now be displayed as either single-value popover views, multi-value popover views, combo boxes with auto-complete, or regular pop-up buttons. A Pick List can also now be configured to obtain its values from a field in any form. The values available in the Pick List are automatically updated as you enter data into the form specified.
- **Custom backups location:** When using the Backup on Quit feature you can now specify where you would like your automatic backups to be kept.
- **Many smaller usability enhancements:** Forms can be dragged and dropped into other categories. Accessory controls can be shown or hidden on custom layouts. New lighter theme look for the My Forms and All Forms lists.

Store 23 different types of information, including:

- Email address
- Contact
- Phone number
- Photos
- Date
- Time
- Date and time
- Text
- Web site address
- Link to form (relational links between forms)
- Inverse relationships
- File Attachment with multi-file support
- GPS location
- Number
- Rating
- Check mark
- Note
- Audio notes (record on iOS, playback on Mac)
- Drawings (draw on iOS, view on Mac)
- Section headings
- Calculations
- Signatures

Where can I get Tap Forms?

- Tap Forms can be downloaded from the following locations:
- Free Trial for Mac: <https://vendors.paddle.com/download/product/503174>
- Mac App Store: <https://itunes.apple.com/us/app/tap-forms-organizer-5-+-secure/id1081981112?ls=1&mt=12>
- iOS Universal: <https://itunes.apple.com/us/app/tap-forms-organizer-5-+-secure/id1084143351?ls=1&mt=8>

Story Angle Ideas

- “Tap Forms 5 is the digital filing cabinet for life’s scattered details”
- “Build the perfect organizational app, tailored just for you — no programming required”
- “Tap Forms developer proves you can build a sustainable app business” — Brendan has been building Tap Forms full time for over 5 years
- “Tap Forms 5 is the biggest update ever for the popular organizational app”
- “Looking for a Bento replacement? Tap Forms is it”

Pricing

As the biggest update to Tap Forms ever, Tap Forms 5 will not be released as an update to Tap Forms 4. Instead, Tap Forms 5 will be released as new apps on the Mac and on iOS.

- The normal price for Tap Forms 5 for Mac will be \$49.99
- The normal price for Tap Forms 5 for iOS (which is no longer a separate app on iOS and iPad — it is one universal app) will be \$16.99

Upgrade Pricing and launch discount

- Current Tap Forms 4 Mac users who downloaded Tap Forms directly (not from the Mac App Store) will get a discount on Tap Forms 5.
- Current Tap Forms 4 Mac users who downloaded Tap Forms from the Mac App Store can download Tap Forms from our [website](#) which has code to recognize that they purchased Tap Forms on the Mac App Store. At that point they can buy Tap Forms 5 at the discounted rate from our website. This extra step is required because upgrade pricing is not available on the Mac App Store.
- Any Tap Forms customer (and really anyone at all) can take advantage of the 50% launch discount that will last for 48 hours after launch — from August 4, 2016 to August 6, 2016.

FAQs

How much does Tap Forms cost?

Tap Forms costs \$49.99 for Mac and \$16.99 for iOS, but you can also enjoy a free 10-day trial on the Mac version.

What are the system requirements for Tap Forms?

Mac: OS X 10.9 or later, 64-bit processor

iOS: iOS 9.0 or later. Compatible with iPhone, iPad, and iPod touch (Universal).

Can I import my data from Bento?

Using the Mac version of Tap Forms, you can easily import your existing Bento data by simply selecting your template file exported from Bento. We take it from there.

Can I use Tap Forms on multiple devices?

Tap Forms allows you to access your data on any device, anytime. And with IBM Cloudant and Nearby WiFi Sync support, you can securely sync and back up your data with ease.

The Tap Forms Story

Creator of Tap Forms, Brendan Duddridge

Based in Calgary, Alberta, Canada, Tap Forms is the brainchild of Brendan Duddridge, president and owner of Tap Zapp Software Inc. After seeing the original iPhone and understanding its potential, it was clear that a major need had yet to be met in the soon-to-come App Store: some way of easily storing and managing information in a simple-yet-powerful, structured format. In May of 2008, a few months before the launch of the App Store, Tap Forms was born.

In September of 2008, Tap Forms went live on the App Store. By February of 2009, Tap Forms became one of the main featured

apps on the App Store in places all around the world, garnering not only a position in the “What's New” area, but also with a large feature panel in the middle of the App Store. Since then, Tap Forms has also been featured in many of Apple’s retail stores around the world.

Following the success of Tap Forms for iOS app, work on the iPad version began—which was shortly before the release of the first iPad. Work then began on the Mac OS X version of Tap Forms, which would provide a complete mobile and desktop database application suite.

In 2013, FileMaker® announced the end of support for its popular Bento® desktop and mobile database app, which thrust Tap Forms into the spotlight as the only truly viable, price-competitive alternative. Shortly after that, Tap Forms was enhanced with a full Bento template importing capability which gave customers a simple and intuitive way to import their entire Bento libraries right into Tap Forms.

With the upcoming 5.0 version, Tap Forms will reach a whole new level of simple-yet-powerful desktop and mobile database applications.
